Environmental Policy

Environmental Policy

Our perception of environmental awareness is to put sustainability at the heart of development. It forces us to think differently, so by default we are innovative and offer solutions which enhance customer feelings and manages our planetary boundaries..

Our Environment Policy is to be a responsible corporate citizen in protecting the environment. We are committed to complying with accepted environmental practices, including the commitment to meet or exceed legal and other requirements whilst embedding the targets and indicators of the UN17SDGs into our People and Place.

Our Environmental Policy provides the framework for setting and reviewing environmental objectives and targets and these will be documented within our environmental management systems.

National Pride pledges to operate and implement all our management systems and sustainability documents to further enhance our environmental performance. National Pride pledges to align People Planet and Place in all aspects of environmental performance.

National Pride pledges to regularly (annual as a minimum) update and implement these environmental objectives in line with our Sustainability Policy SMART objectives.

This policy will be communicated to all parties interested in the performance of our environmental management systems and displayed in both virtual and in person locations on websites and buildings.
